To Whom it May Concern

I am staunchly opposed to regulations that force any town to comply with your proposed draconian zoning regulations to force the infiltration of federal or state-subsidized "affordable housing". The term "affordable housing" is nothing but a moniker for Section 8 and low-income housing to serve a group of the population on the backs of a given town's taxpayers. The negative ripple effects to school systems, police, and environmental impact have been in many cases overlooked to further the "social justice" cause. Each respective resident of many of the targeted towns has worked hard to provide a living environment of THEIR CHOICE. Why should ANY politician dictate policy that will have long-term negative effects on the fabric of a community? THIS IS NOT COMMUNIST CHINA.... YET...
