

I strongly oppose the S.B. 1024. This is another attempt by the state to interfere in local affairs, aimed at upending local control of land use decisions. When it comes to development, it's local residents—not the state or special interest groups—who know what works best for our communities. We are already dealing with 8-30g regulation that by-passes local zoning, it is used by unscrupulous developers to dump large developments in the middle of small towns under the guise of affordable housing. Enough!
The name of the special interest group Desegregate CT implies that CT is segregated, it is not!
