

From Statute:

1. Develop a list of data points to be collected by institutions of higher education through student responses to sexual misconduct climate assessments.

2. The survey must cover the following per the legislation:

(A) student awareness of institutional policies and procedures related to sexual assault, stalking and intimate partner violence,

(B) if a student reported sexual assault, stalking or violence to an institution of higher education or law enforcement, the response to and results of such report

(C) student perceptions of campus safety

3. Our job is to "recommend one or more sexual misconduct climate assessments that collect the data points identified by the council"

HH—but this follows 1 above. We have to first agree on the data points, and then recommend assessment instruments. The point in 3 does not preclude us from collecting data that can be compared or used as baseline, if the purposes of this survey were more clearly defined.

Instruments Shared by Council Members (in the shared folder)

HERI

SES (Koss et al review of 30 years of SES use is in folder)
