2007 REGULAR AND JUNE SPECIAL SESSION BILL TRACKING REPORT

By: Kristin Sullivan, Associate Analyst
Ryan F. O'Neil, Research Assistant

This report lists the bills considered during the General Assembly's 2007 regular session and June Special Session (JSS) whose provisions were enacted under another bill number. The provisions of many bills that die in committee or on the calendar in fact become law after (1) the original committee incorporates them in another bill that receives a favorable report or (2) a member offers the concept as an amendment that is adopted and incorporated in another bill. This report includes bills that may have changed in the final enactment from the language of the original committee bill or file, but that represent the legislature's final action on the matter taken during one of the sessions referenced above.

During the 2007 regular session and June Special Session, the content or concept of 222 bills started as separate legislation but was later incorporated in other bills that passed. Table 1 lists the original bills in numeric order and shows the public act that included their provisions. Table 2 lists the bills by the committee to which they were first referred.
