---

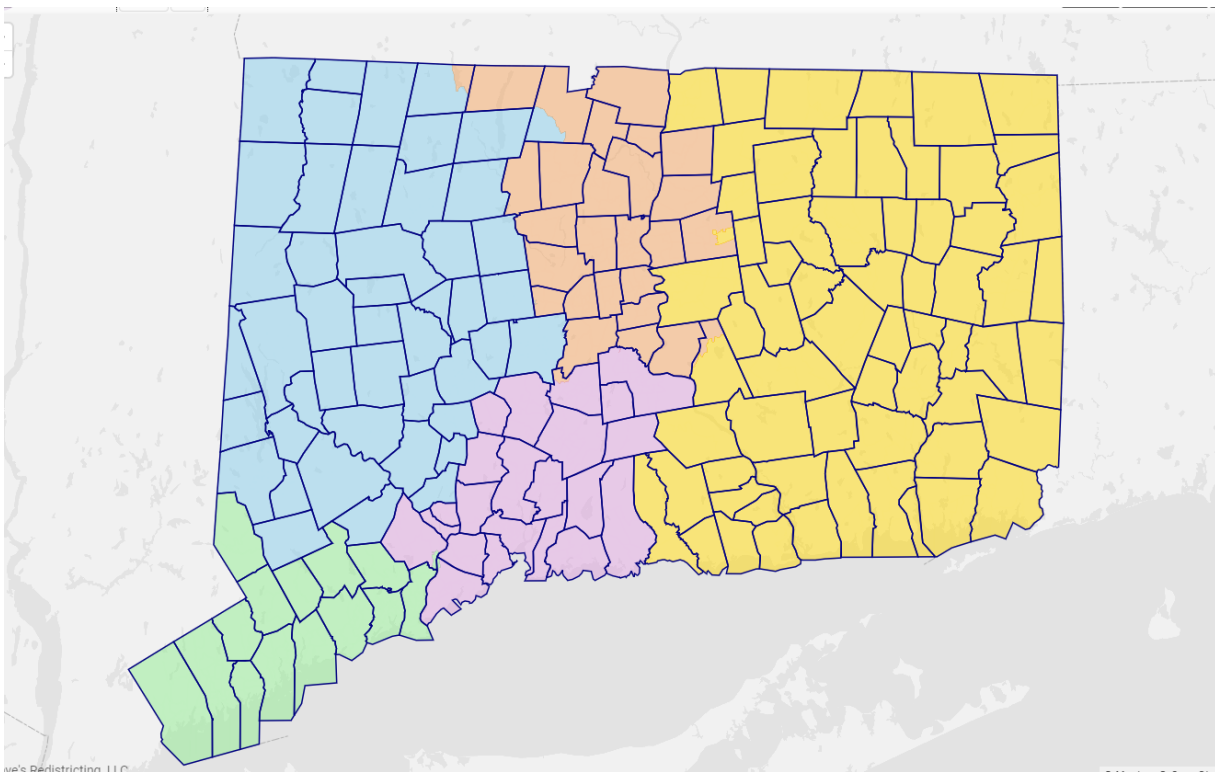

Dear members of the Reapportionment Commission,

My name is Sarah Flores and I am a student at Trinity college currently enrolled in "Mathematics and Redistricting" with Professor Kyle Evans. We believe in fair maps and would like to share with you a congressional plan that was created using Dave's Redistricting.

<https://davesredistricting.org/join/a4659b8e-edc3-4d15-a86e-3168011c820c>

We believe that this map is fair for the following reasons:

- It maintains the core of existing districts/regions in Connecticut: Fairfield County, New Haven, Hartford, Danbury/Waterbury, and Eastern Connecticut.
- Our population deviation is 7% , with only a 721,190-person difference between the most and least populous districts.
- We did not use incumbent addresses in our process.
- We kept town borders intact as much as possible and only split a certain number of towns strictly for minimizing the population deviation.

Thank you for your consideration of our work in this important process.

Sincerely,  
Sarah Flores
